Art Unit 1711

This application contains claims directed to the following patentably distinct species of the claimed invention: Applicants are required to elect the single polyoxymethylene resin by selecting either block copolymers or branch copolymers or polymers which are neither branched nor block copolymers. If applicants select block copolymers, then they should select a specific block copolymer by choosing a specific combination of A and R₁ and B from claim 8. Applicants are also required to elect a single species of thermoplastic elastomer by selecting either random block or graft thermoplastic elastomers and also selecting either polyolefinic elastomers or styrenic elastomers or polyester based elastomers or polyamide based elastomers or polyurethane based elastomers as set out on page 10 lines 15-20 of applicants' specification. Applicants are also required to elect either lubricant additives or additives which are polyolefins. If applicants elect polyolefins, then they should elect a single species of polyolefin from one of those in claim 12. Applicants should also elect a single molded product from either outsert molded products or a chassis or a tray or side plate or a mechanical working component. If applicants elect mechanical working components, they should elect a single species of said mechanical working components from one of those in claim 16.

Art Unit 1711

Applicants are required under 35 U.S.C. § 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, all claims are generic.

Applicants are advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that claims 1-16 are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicants will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicants must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicants traverse on the ground that the species are not patentably distinct, applicants should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or

admission may be used in a rejection under 35 U.S.C. § 103(a) of the other invention.

It is noted that although all claims are generic to at least one of the above species, not all claims are generic to all species.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Due to the complexity of this election requirement, no telephone election was attempted.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey Mullis whose telephone number is (703) 308-2820. The examiner can normally be reached on Monday-Friday from 9:30 to 6:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Seidleck, can be
